

Enhance the football player's velocity

What you want :

- *A top level performance for your football players*
- *An improvement of their running ability*

What you need :

- *To test the speed of your players*
- *To improve their running technique*
- *To manage training according to period of fatigue*
- *To control training after an injury*

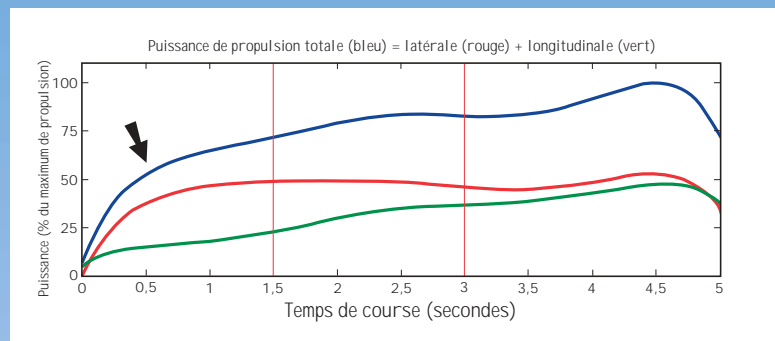

Locometrix allows you :

- **To measure biomechanical characteristics related to sprint performance :**
 - **Time to action**
 - **External explosive power propulsion**
 - **Stride velocity**
 - **Stride length**

Propulsion power index

- Short time to action characterized by a high explosive power propulsion reached in 1/2 second.

- Long time to action characterized by a high explosive power propulsion reached in 2 seconds.
